CAREER SKILLS+™

Mastering AI-Powered Learning with ChatGPT: Your Personalized Guru is an intensive training course designed to equip participants with advanced skills in utilizing artificial intelligence tools like ChatGPT for enhancing professional capacities. Through engaging content and practical applications, this course explores the strategic implementation of AI in various business processes and decision-making scenarios, ensuring participants can leverage AI effectively in their professional roles.

This course is delivered by leading AI experts who bring a wealth of practical experience and theoretical knowledge, focusing on real-world applications, ethical considerations, and innovative AI interaction techniques.

Who Should Attend

This course is ideal for professionals across industries looking to integrate AI into their work processes, enhance their technical acumen in AI, and those interested in responsible and effective AI usage. It's particularly beneficial for project managers, IT professionals, and business strategists.

Course Objectives

1. Develop advanced understanding and skills in AI applications in the workplace.
2. Enhance problem-solving capabilities using AI tools like ChatGPT.
3. Master effective communication techniques to optimize AI interactions for professional development and business outcomes.
4. Understand and address ethical considerations and mitigate bias in AI use.

Agenda

1. Introduction (30 minutes)
Welcome and Icebreaker Activity
Overview of course objectives and structure
2. Understanding ChatGPT (1 hour)
Comprehensive overview of ChatGPT's capabilities
Hands-on interaction and live demonstration
3. Effective Prompting Techniques (1.5 hours)
Deep dive into the art of effective prompting
Group activity: Crafting and evaluating effective prompts
4. Ethical Considerations (45 minutes)
Discussion on ethics in AI usage
Case studies and group discussion on ethical challenges
5. Assignments and Projects (1 hour)
Practical application: Using ChatGPT for personalized learning
Pair/group activity: Sharing and discussing personalized learning experiences
6. Discussion and Q&A (30 minutes)
Collaborative project presentations
Peer evaluation and feedback session
7. Course Conclusion (15 minutes)
Recap of key takeaways
Encouragement for continued learning and AI integration
