CAREER SKILLS+™

This course builds on existing professional experience with personal computer hardware support to present the next tier of skills & concepts students will use on the job when administering any type of network server.

Who Should Attend

This course is designed for IT professionals such as PC, desktop, and help desk technicians who have experience supporting PC hardware who wish to make the transition to become server hardware and support specialists. This course is also designed for existing server managers who are preparing to take the CompTIA Server+ Exam SKO-005.

Course Objectives

On course completion, participants will be able to:
Manage server hardware.
Install server hardware and operating systems.
Configure networking hardware and protocols.
Perform basic server configuration tasks.
Create a virtual server environment.
Administer servers.
Implement server storage solutions.

Secure the server.
Plan and test disaster recovery.
Troubleshoot server issues.

Agenda

Lesson 1: Understanding Server Administration Concepts
Lesson 2: Understanding Virtualization and Cloud Computing
Lesson 3: Understanding Physical and Network Security Concepts
Lesson 4: Managing Physical Assets
Lesson 5: Managing Server Hardware
Lesson 6: Configuring Storage Management
Lesson 7: Installing and Configuring an Operating System
Lesson 8: Troubleshooting OS, Application, and Network Configurations
Lesson 9: Managing Post-Installation Administrative Tasks
Lesson 10: Managing Data Security
Lesson 11: Managing Service and Data Availability
Lesson 12: Decommissioning Servers
