CAREER SKILLS+™

In this specialized course offered through DSDT's CAREER SKILLS+™ program, participants will master the intricacies of enhancing user engagement with Microsoft Copilot for Microsoft 365. Leveraging the comprehensive Microsoft 365 adoption framework, the course guides attendees through crafting and executing a detailed adoption strategy that aligns with organizational goals and digital transformation initiatives.

Who Should Attend

This course is ideal for IT professionals, project managers, change managers, and digital transformation leaders tasked with implementing new technologies within their organizations. Individuals looking to enhance their strategic planning and technology integration skills will find this training particularly beneficial.

Course Prerequisites

Participants should have a foundational understanding of Microsoft 365 and an interest in leveraging Microsoft Copilot to enhance organizational productivity and user engagement.

Course Objectives

Gain a deep understanding of the Microsoft 365 adoption framework and its application in real-world scenarios.
Develop a detailed adoption plan for Microsoft Copilot for Microsoft 365, focusing on strategic, technological, and human-centric factors.
Equip organizational change agents with the tools and knowledge necessary to drive and sustain technology adoption.
Measure and optimize the impact of Microsoft Copilot within diverse business environments through effective monitoring and feedback mechanisms.

Agenda
